MFG CORE MESSAGE

It is a moment of rejoice to introduce ourselves to our clients and patrons. We believe whatever we have achieved; its credit should be directed toward our clients.

We instigated our journey in 1998 with a vision of becoming the most recognized knitwear manufacturer in the country and taking BANGLADESH's widely known reputation as a global clothing leader to a new high by offering the best blend of quality and efficiency.

We have expanded its capacity, developed a skilled management team, and workforce, and integrated sophisticated technologies in order to become globally competitive. Therefore, when many struggle to survive in post-MFA world; our business in fact enjoying a healthy growth.

Our painstaking efforts to reengineer each step of our value chain— procurement, production process & planning, workforce productivity & efficiency, and technologies—and turn them into core competencies have paid off.

Focusing solely on knitwear apparel lines, we have adopted a structure by reengineering its value chain to deliver high-quality products in a shorter lead time with flexibility in order size.

Moreover, having endless efforts to ensure internationally accepted employment practices, our clients recognize us as a partner to protect their value system and images among final consumers.

A portrait of Engineer Md. Shamsuzzaman Nasim, CIP, a middle-aged man with a receding hairline, smiling and wearing a dark suit jacket over a red and white striped shirt. He has his arms crossed and is wearing a watch on his left wrist. The background is a blue and white geometric design.

MESSAGE FROM MANAGING DIRECTOR

Engineer Md. Shamsuzzaman Nasim, CIP Managing Director, Micro Fibre Group

Micro Fibre hit the road in 1997. The Multi Fibre Arrangement (MFA) expired in 2004 putting many readymade garments factories in Bangladesh into survival threat. But we survived the challenge and soon proved our potential. Even early in this current decade, when the entire western apparel market across America and Europe went into depression, we continued to register a double-digit growth. For long, we have been maintaining an average yearly export growth of about 15 percent. Conservatively projected, Micro Fibre is going to cross the US\$300 million export mark by the year 2022. Today, we are considered as a model of success as a one-stop fully vertical knitwear manufacturer and exporter from Bangladesh.

We believe our success is, in fact, a fabulous gesture of reciprocation from our valued clients – the globally reputed apparel buyers, who are actually the ultimate ambassadors of our mission. We sincerely serve them in terms of quality, timely delivery, value for the price, quick adaptation to changes in the world apparel markets and, of course, in terms of eco-friendliness as well as other social and ethical values and practices they adhere to. We have learnt that if we listen to the clients first, they will listen to us too. We practice accordingly. We are confident to envisage a globally recognized status of ours as a leading knitwear supplier well before 2025. Yes, we are working hard for a continued progress powered and shared by all in our relation chain.

OUR APPROACH DESIGN & DEVELOPMENT

“
WE DEVELOP OUR
OWN COLLECTION
OF KNITWEAR
APPAREL, ALONG
WITH, TURNING
OVER THE CLIENT'S
SAMPLING
REQUEST.”

We launched its product design & development division at the beginning of 2004 by remodeling its sampling division and are looking forward to getting it fully functional in 2006 in terms of offering its range of designed products. Headed by a foreign expert, this full-fledged section delivers exactly the right samples as per clients' requirements.

Working with the clients closely, from an initial sketch or original sample to the

development of a range of counter samples, ensures value for clients.

Its designers, all trained in reputed foreign & local institutions, blend their skills with inputs of ever-changing global fashion trends.

And as a team, we develop our own collection of knitwear apparel, along with, turning over the client's sampling request.

OUR APPROACH

QUALITY CONTROL & ASSURANCE

“

OUR
PRINCIPLES
OF “FIT FOR
PURPOSE”
AND
“DO IT RIGHT
THE FIRST
TIME”

Throughout our fifteen years of operation, we have refined our Quality Control System, which includes thorough checks on materials, processes, and products. By continuously remodeling this system, we have achieved an industry-low rework and repair rate, enabling us to deliver high-quality products in the shortest time possible.

Our principles of “fit for purpose” and “do it right the first time” are deeply embedded in our culture, allowing us to meet any AQL requirements set by value-savvy clients.

We have invested in the latest technology, including a computerized quality control and feedback process, fostering a strong

quality consciousness among our workforce. Our experienced quality control team also plays a crucial role in sourcing raw materials, chemicals, and accessories, as well as recommending new technologies.

Starting in 2006, our quality control and assurance teams will work more collaboratively to ensure quality through continuous feedback. From selecting the right chemicals for fiber color tolerance to adopting technologies that ensure quality and comfort, we are committed to delivering maximum value to our clients.

OUR APPROACH

WORKPLACE ENVIRONMENT

As a responsible apparel producer, we prioritize creating a work environment that exceeds legal requirements and aligns with global standards. This commitment supports our clients' images and sourcing principles.

01. ADVANCED INFRASTRUCTURE

We have installed and updated lighting, ventilation, and ergonomics using the latest technologies, such as bus bars for electrical fittings and overhead mirror reflectors.

02. SAFETY MEASURES

Clearly marked emergency routes and exits, smoke and fire detectors, and thoughtfully designed layouts ensure a safe workplace.

03. COMPLIANCE WITH STANDARDS

We adhere to ISO requirements by posting instructions and warning signs in highly visible areas, including in Bangla.

04. REDUCED ACCIDENTS

The use of safety equipment, such as metal gloves during fabric cutting and needle guards during sewing, significantly lowers work-related accidents.

05. SUPPORTIVE ENVIRONMENT

Our workplace fosters mutual cooperation and respect between managerial staff and workers.

06. EMPOWERMENT PROGRAMS

We actively recruit women and implement programs to train and promote them to higher positions within the organization.

OUR APPROACH

WORKER'S WELFARE

Besides paying a "living wage" which is substantially higher than the legal minimum, we support its employees by setting up welfare facilities like medical centers, day-care centers, and canteen.The result is an industry-low turnover rate in its workforce.

OUR APPROACH

CODE OF CONDUCT

“
AT MFG,
COMPLIANCE
IS AN ONGOING
PROCESS, NOT
A ONE-TIME
EVENT.”

As a responsible apparel producer, we strive to exceed local laws and meet ILO conventions on employment practices, maintaining these standards continuously.

Our success is built on strict adherence to ethical business practices with clients, suppliers, and stakeholders. Our ability to deliver short lead times is made possible by the mutual trust and commitment we share with our suppliers.

Additionally, we have implemented a water treatment plant to preserve the surrounding environment and keep the community green.

- | | | | | | |
|----|--|----|--|----|--|
| 01 | Full-time medical unit offers healthcare services and covers work-related injury treatments. | 02 | Daycare centers provide safe, hygienic, and supervised care for children of working mothers. | 03 | Canteens, safe drinking water, and clean lavatories ensure a comfortable workplace. |
| 04 | An emergency fund offers workers interest-free loans during financial crises. | 05 | 'Pick & Drop' program provides convenient transportation for workers. | 06 | Yearly entertainment events like picnics are organized for workers and their families. |

OUR APPROACH

MFG WORKPLACE FACILITIES

SAFETY AND INFRASTRUCTURE

Fire Safety

Adheres to Bangladesh Fire Service and Civil Defense guidelines.

Emergency Exits

Three staircases for quick evacuation.

Parking

Ample space for loading, unloading, and private vehicles.

Electrification

Concealed wiring for safety.

Ventilation

Proper ventilation and lighting throughout the facility.

HEALTH AND HYGIENE

01 Personal Protective Equipment

Aprons, caps, and masks are provided to all workers.

02 Healthcare

Monthly health checks and first aid facilities.

03 Sanitation

WORK FLOW

DESIGN & DEVELOPMENT

Crafting innovative and tailored designs to meet customer needs.

01

SAMPLING

Creating prototypes to ensure quality and precision before mass production.

02

PRINTING

Advanced printing technology delivers precise, intricate designs on fabrics, enhancing visual appeal and customization.

07

CUTTING

Fabrics are checked for continuity, and defects, and numbered before bundling per batch.

08

STITCHING

Uses ballpoint needles, checks cut pieces, and tracks defects. A quality controller oversees each line, with stitch control cards per customer specs.

09

QUALITY AUDIT

A qualified quality controller checks each aspect of the operation, performs AQL, and can stop production if quality standards are not met.

10

SPINNING

Converting raw fibers into high-quality yarn for further processing.

03

KNITTING

Producing fabrics through advanced knitting techniques for various applications.

04

DYEING

Expertly dyeing fabrics to achieve vibrant, long-lasting colors with machines that maintain sustainability compliances.

05

WASHING

Innovative eco-friendly washing techniques ensure softness, durability, and unique finishes for high-quality garments.

06

FINISHING SECTION

Garments are measured, pressed, packed, and carted for final inspection only if they meet the tolerance level.

11

COC TEAM

An independent Code of Conduct Team monitors compliance with buyer requirements regarding safety, cleanliness, and other factors.

12

PC TEAM ROLE

The PC Team is responsible for collecting production status on a timely (hourly) basis and maintaining records related to production.

KNITTING UNIT AT A GLANCE

4 UNITS

LOCATION

Narayangonj Highway, near
Usmany Cricket Stadium, Fatullah
(16 km from Dhaka).

Kaliakair, Gazipur
(45 km from
Dhaka).

Vulta, Rupgonj
(18 km from
Dhaka).

PRODUCTION
CAPACITY

28 TONS
PER DAY

07 TONS
PER DAY

55 TONS
PER DAY

45 TONS
PER DAY

TYPES OF
PRODUCTION

- Single Jersey
(solid, Lycra, feeder stripe)
- Rib (1x1, 2x2 Lycra Rib, Drop
Needle Rib)
- Interlock
(Plain, Drop Needle)
- Fleece
(2-thread, 3-thread)
- Polo Pique, Lacoste
Mini Jacquard
- Waffle, Thermal, and other
specialty fabrics
